

Confederation of Tomorrow 2024 Survey

Detailed Data Tables

TABLES FOR REPORT ON FEDERAL-PROVINCIAL RELATIONS

Field dates:

The 2024 study consists of a survey of 6,036 adults, conducted between January 13 and April 13, 2024 (82% of the responses were collected between January 17 and February 1); 94% of the responses were collected online. The remaining responses were collected by telephone from respondents living in the North or on First Nations reserves.

The Environics Institute for Survey Research
33 Bloor Street East, Suite 701
Toronto, ON M4W 3H1

Technical note: survey weighting

Data presented in these tables are weighted for several factors, including region (province or territory), gender, age, education, immigration background, and Indigenous identity. As the result, for the 449 respondents in the three territories are reduced in weight to their proportion of the total Canadian population. For this reason, the survey sample for the three territories was weighted separately on the basis of gender, age, territory, education and Indigenous identity. This separate weighting was used to generate the results for the territories (individually and as a region).

In addition, beginning in 2023, results for Indigenous Peoples when reported separately are weighted by additional factors, including by First Nations, Métis and Inuit identity and residence on- or off-reserve.

The tables that follow use the national weights. Tables using the separate weights for the territories and for Indigenous Peoples are available upon request at info@environicsinstitute.org.

Q79. Do you think the federal and provincial/territorial governments are working very well together, somewhat well, not very well or are they not working at all well together?
