## Canada's World Survey - 2018

### Banner-Question Key

This detailed set of statistical tables shows survey results for the total general population and also by various subgroups of interest. For this table set there are three “banners” of subgroups, drawn from questions in the survey. The results have also been tested for significant differences within these subgroups. The statistical tests undertaken are an independent T-Test for means and independent Z-Test for percentages. The following key shows the questions used to create the banner subgroups and also what groups have been tested for significant differences in each of the banners.

In the tables that follow, **upper case letters** under the percentages indicate subgroup differences that are significant at the **95% level**.

Q20. As you may know, the world has been experiencing an unprecedented number of people migrating across countries and continents, many of whom are refugees fleeing dangerous conditions in their home countries. In the past two years Canada has responded by expanding the number of refugees it accepts, which totaled about 30,000 in the past year. Most of these refugees are Syrians who were living as displaced persons in neighbouring countries.

For each of the next two years, do you think Canada should:

## Canada's World Survey - 2018

Q24. Do you think Canada can have a positive impact on world affairs by serving as a role model to other countries.  
By this I mean setting an example at home for how important issues can be addressed, that might show other countries what can be done?
