Q15. Some people say there will always be people in society who will be hungry and homeless; it may be regrettable, but it is a fact of life. Other people say there is no excuse for hunger and homelessness in a prosperous society like ours; we could eliminate poverty if we really wanted to. Which of these views is closer to your own?

A Better Canada (2020)

Q19. Some people think of taxes as mostly a positive thing because they are how we pay for the important things that make our quality of life good, such as health care, education, and roads. Other people think of taxes as mostly a negative thing because they take money out of people's pockets and hold back economic growth and the creation of wealth. Which one of these views is closer to you own?
