

Confederation of Tomorrow 2021 Survey

Detailed Data Tables

REPORT 3 – ADDRESSING CLIMATE CHANGE IN THE CANADIAN FEDERATION

Field dates: January 25, 2021 – March 1, 2021

The Environics Institute for Survey Research
33 Bloor Street East, Suite 900
Toronto, ON M4W 3H1

Technical note: survey weighting

Data presented in these tables are weighted for several factors, including region (province or territory), gender, age, education, immigration background, and Indigenous identity. As the result, for the 450 respondents in the three territories are reduced in weight to their proportion of the total Canadian population. For this reason, the survey sample for the three territories was weighted separately on the basis of gender, age, territory, education and Indigenous identity. This separate weighting was used to generate the results for the territories (individually and as a region) that appear in these tables.

Q2. In your opinion, what is the most important problem facing CANADIANS today?

Q33. In developing a strategy to fight climate change, do you think that each of the following should be a high priority, a medium priority, a low priority or not a priority at all for Canada?
Increasing Canadian exports of resources like natural gas to other countries so they can phase out their use of less clean energy sources like coal

Q33. In developing a strategy to fight climate change, do you think that each of the following should be a high priority, a medium priority, a low priority or not a priority at all for Canada?
Meeting the greenhouse gas reduction targets that Canada agreed to in international agreements like the Paris Agreement on Climate Change

Q33. In developing a strategy to fight climate change, do you think that each of the following should be a high priority, a medium priority, a low priority or not a priority at all for Canada?
Making sure that the premiers of all the provinces and territories are in agreement with Canada's climate change strategy
